

Views - Chapter 12

Objectives

Learn the basics about views.

Intro

This assignment is a tutorial where you will copy the code directly from the book. Your queries should run and produce the results described in the text.

Use your `ap_userID` database for these exercises.

Create a file named `views_yourlastname.sql`

Copy and run the following

Copy and run all of the views from the following pages.

Be sure to write the `SELECT` statement that runs the view!

- p. 383
- p. 387
- p. 389
- p. 398

There are more but that's enough.

Save and submit your work in Moodle.
